

Gestural Characterization of a Phonological Class: the Liquids

A Dissertation
Presented to the Faculty of the Graduate School
of
Yale University
in Candidacy for the Degree of
Doctor of Philosophy

by
Michael Ian Proctor

Dissertation Director: Darya Kavitskaya

December 2009

Acknowledgements

This dissertation could not have been written without the generous help of my family, friends, teachers, and colleagues. Thank you all.

I have been inspired by the community of researchers at Haskins Laboratories, especially Chris Shadle, Khalil Iskarous, Doug Whalen, Hosung Nam, Mark Tiede and Aude Noiray, and partially supported by NIH grants NIDCD RO1 DC 006705 and NIDCD RO1 DC 02717.

Erich Round, Tine Mooshammer, and the Yale Phonetics and CLAY groups have provided great feedback and encouragement along the way, and helpful critique of presentations. I was generously assisted by Shri Narayanan, Erik Bresch, the SPAN group at USC, and by my experimental participants and language informants.

It is my great fortune to have had wonderful teachers at Yale and the University of Queensland. I would like to thank Dianne Jonas, Charles Yang, Stanley Insler, Maria Piñango, Larry Horn, Carol Fowler, Rob Pensalfini, Mary Laughren, Michael Harrington, David Lee, Lynn Wales, and especially John Ingram, for encouraging me to pursue my interest in linguistics.

Above all, I am indebted to the members of my committee – Dasha Kavitskaya, Jelena Krivocapić, Steve Anderson and Louis Goldstein – for their wisdom, criticism and guidance. Thank you all for keeping me on track, sharing your ideas, and helping me come to a better understanding of phonetics and phonology.

Contents

Abstract	i
Acknowledgements	iii
Table of Contents	iv
List of Tables	ix
List of Figures	xii
1 Introduction	1
1.1 The Class of Liquids	2
1.1.1 Scope	3
1.2 Phonological Behavior of Liquids	4
1.3 Capturing the Class of Liquids	5
1.3.1 The Feature [sonorant]	5
1.3.2 The Feature [approximant]	6
1.3.3 The Feature [liquid]	6
1.4 Phonetic Characterization of Liquids	7
1.4.1 Phonetic Properties of Rhotics	7
1.4.2 Phonetic Properties of Laterals	8
1.4.3 Phonetic Properties of Liquids	9
1.5 Representing Liquids in the Articulatory Domain	10
1.5.1 Gestural Primitives in Phonology	10
1.5.2 Tract Variables	13
1.5.3 The Gestural Structure of Liquids	15

1.6	Organization of the Dissertation	16
2	Phonological Characterization of the Class of Liquids	18
2.1	Distributional Behavior of Liquids	19
2.1.1	Distribution within the Word	19
2.1.2	Distribution within the Syllable	22
2.2	Phonological Processes Involving Liquids	27
2.2.1	Assimilation	27
2.2.2	Dissimilation	28
2.2.3	Harmonization	29
2.2.4	Metathesis	30
2.2.5	Merger	32
2.2.6	Neutralization	33
2.2.7	Alternation	33
2.2.8	Post-Vocalic Liquids	35
2.3	Liquid Allophony	37
2.3.1	Phonologically-Conditioned Liquid Allophony	37
2.3.2	Free Variation of Liquids	37
2.4	Asymmetries in the Behavior of Liquids	38
2.4.1	Word-Level Distributional Asymmetries	39
2.4.2	Clustering Asymmetries	40
2.4.3	Asymmetries in Syllabification	41
2.4.4	Interactions with Syllable Nuclei	42
2.4.5	Asymmetries in Liquid Syllabicity	43
2.4.6	Summary: Asymmetries between Liquids	43
2.5	Summary: Phonological Characterization of the Class of Liquids	44
3	The Phonology of Spanish Liquids	46
3.1	Spanish Consonantal Phonology	47
3.1.1	Liquid Inventory	48
3.1.2	Distribution of Rhotics	48
3.2	The Phonology of Spanish Liquids	50

3.2.1	Spanish Syllable Phonotactics	50
3.2.2	Phonological Processes Involving Liquids	54
3.2.3	Phonological Acquisition of Spanish Liquids	57
3.2.4	Summary – The Class of Liquids in Spanish	57
3.3	Phonetic Characterization of Spanish Liquids	58
3.3.1	Phonetic Properties of Spanish Laterals	59
3.3.2	Phonetic Properties of Spanish Rhotics	60
3.4	Summary	64
4	Experimental Investigation of Spanish Liquid Production	66
4.1	Investigating the Goals of Consonant Production using Coarticulation . . .	67
4.2	Method	68
4.2.1	Subjects	68
4.2.2	Lingual Imaging	69
4.2.3	Audio Acquisition	70
4.2.4	Articulatory Analysis	70
4.2.5	Acoustic Analysis	71
4.3	Phonetic Characterization of Intervocalic Liquids	71
4.3.1	Stimuli	71
4.3.2	Results: Acoustics of Intervocalic Coronal Consonants	72
4.3.3	Formant Analysis of Intervocalic Liquids	79
4.3.4	Summary: Acoustic Properties of Spanish Intervocalic Liquids . . .	82
4.3.5	Results: Dynamic Analysis of Midsagittal Lingual Articulation . . .	84
4.3.6	Comparison of Mid-consonantal Dorsal Articulation	88
4.3.7	Summary of Results – Spanish Intervocalic Consonants	94
4.4	Phonetic Characterization of Spanish Coda Liquids	95
4.4.1	Stimuli	95
4.4.2	Results: Acoustic Characterization of Word-Final Rhotics	95
4.4.3	Svarabhakti in Coda Rhotics	98
4.5	Conclusions	101

5	Articulatory Modeling of Spanish Liquids	103
5.1	Gestural Characterization of Spanish Coronal Consonants	104
5.1.1	Gestural Characterization of Spanish Liquids	105
5.1.2	Articulatory Modeling of Spanish Liquids	106
5.2	Gestural Organization in Spanish Codas	111
5.3	Gestural Organization in Spanish Complex Onsets	113
5.4	Articulatory Analysis of Phonological Processes Involving Spanish Liquids	114
5.4.1	Rhotacism, Lambdacism, and Liquid Neutralization	114
5.4.2	Liquid Vocalization	115
5.4.3	Metathesis	117
5.4.4	Rhotic Svarabhakti	118

List of Tables

1.1	Liquid-final maximal onset clusters in Russian and French	2
1.2	Contrasting syllabifications in Homeric Greek, Attic Greek and Latin	3
1.3	A set of track variables and associated articulators	14
1.4	Gestural score of the English word /bad/	15
2.1	Constraints on liquid distribution: *word-initial	19
2.2	Korean Nativization of Liquid-Initial Words	20
2.3	Constraints on word-initial consonants: Yaygir	20
2.4	Preservation of word-final liquids: French	21
2.5	Dutch three-consonant onset clusters	24
2.6	Tamil word-initial consonant clusters	25
2.7	Dutch two-consonant coda clusters	26
2.8	Total assimilation of nasals: Latin liquid-initial stems	27
2.9	Total assimilation of nasals: Hausa liquid-initial syllables	28
2.10	Dissimilation of laterals: Latin suffixation	29
2.11	Harmonization of liquids: Bukusu suffixation	30
2.12	Slavic Liquid Metathesis	31
2.13	Reciprocal Metathesis of Sonorants	32
2.14	Liquid correlations in Polynesian cognates	32
2.15	Liquid neutralization: Latin > Sardinian	33
2.16	Rhotic cluster lateralization: Jamsay	34
2.17	Nucleic lengthening and deletion of post-vocalic liquids: Australian English	35
2.18	Vocalic Lengthening and Deletion of Coda Liquids: Nganjan	36
2.19	Phonological Conditioning of Liquids: Korean	37

2.20	Total Assimilation of Rhotics: Koyra Chiini	39
2.21	*Rhotic-Initial: Sestu Campidanian Sardinian	40
2.22	Diachronic Instability of Romance Obstruent-Lateral Clusters	41
2.23	Instability of Medial Obstruent-Lateral Clusters: Dutch	42
3.1	Phonemic inventory of standard Latin American Spanish	47
3.2	Distribution of Spanish rhotics	49
3.3	Frequencies of occurrence of Spanish syllable types	51
3.4	Possible Spanish onset clusters	51
3.5	Representative frequencies of Spanish coda consonants	52
3.6	Diachronic stability of Spanish word-final liquids	53
3.7	Rhotic svarabhakti in Peninsular Spanish -rC- clusters	62
3.8	Svarabhakti in Spanish rhotic onset clusters: ‘prado’	63
3.9	Svarabhakti in Spanish rhotic medial clusters: ‘arboles’	63
4.1	Participants in the Spanish liquids study	69
4.2	Mean durations of Spanish intervocalic consonants	75
4.3	Hypothesis testing of Spanish differential dorsal displacement by class	92
4.4	Dorsal targets of Spanish intervocalic liquids	93
5.1	Tract variable specifications for Spanish voiced coronal consonants	106
6.1	Phonemic inventory of Contemporary Standard Russian	122
6.2	Liquid contrasts in Russian	126
6.3	Russian ‘reverse sonority’ clusters arising from jer deletion	128
6.4	Development of liquid-jer sequences in Slavic	133
6.5	Preservation of pre-liquid jers in North Eastern Slavic	133
6.6	Metathesis of vowel-liquid sequences in Russian	134
7.1	Participants in Russian liquids study	138
7.2	Hypothesis testing of Russian differential dorsal displacement by class	147
7.3	Mean dorsal gestural displ.: Russian intervoc. non-palatalized liquids	148
8.1	Tract variable specifications for Russian non-palatalized coronal consonants	156

8.2	Tract variable specifications for Russian palatalized coronal consonants . . .	161
8.3	Gestural Score: Late Common Slavonic /olkoti/	165
8.4	Gestural Score: Modern Russian /lokotʲ/	166
8.5	Gestural Score: Late Common Slavonic /vilkʊ/	167
8.6	Gestural Score: Russian /volk/	167
8.7	Gestural Score: Czech /vʲk/	167
9.1	Consonantal allophony in Rotokas	179
9.2	Rhoticization of clear laterals: Sphakiá Greek	181
B.1	Spanish elicitation items: word-initial environment	213
B.2	Spanish elicitation items: intervocalic onset environment	214
B.3	Spanish elicitation items: intervocalic coda environment	214
B.4	Spanish elicitation items: word-final environment	215
C.1	Mean Formant Frequencies, Spanish Medial Onset Consonants: W1	216
C.2	Mean Formant Frequencies, Spanish Medial Onset Consonants: W2	217
C.3	Mean Formant Frequencies, Spanish Medial Onset Consonants: W3	217
C.4	Mean Formant Frequencies, Spanish Medial Onset Consonants: W4	218
C.5	Mean Formant Frequencies, Spanish Medial Onset Consonants: M1	218
C.6	Durations of Spanish Intervocalic Consonants	219
C.7	Number of coronal closures: Spanish onset rhotics	220
C.8	Number of coronal closures: Spanish coda rhotics	220
D.1	Russian elicitation items: intervocalic environment	221

List of Figures

1.1	Consonants functioning as rhotics	8
1.2	Articulatory commonalities between English liquids and vowels	9
1.3	Coupling graph: phonological structure of the word /bad/	11
1.4	Coupling graph: phonological structure of the word /pad/	12
1.5	Contrasting phonological representations of coronal stops and liquids	15
1.6	Gestural timing and lingual trajectories in coronal stop and liquid onsets	16
3.1	Spectra of cluster-initial Spanish words showing svarabhakti	62
3.2	A gestural account of intrusive svarabhakti vowels	63
4.1	Dynamic imaging of midsagittal lingual articulation using HOCUS	69
4.2	Matlab GUI used to review synchronized ultrasound and audio data	70
4.3	Acoustic waveforms and spectra: Spanish intervocalic stop [ede]	72
4.4	Spectra: spirantized intervocalic stop [eðe], subjects W3, W4	73
4.5	Spectra: varying degrees of spirantization in intervocalic stop production	73
4.6	Spectra: heavily spirantized intervocalic stops	74
4.7	Acoustic waveforms and spectra: Spanish intervocalic laterals	75
4.8	Spectra: comparison of Spanish intervocalic coronal stops and taps	76
4.9	Spectra: variation in number of closure intervals, Spanish intervocalic trills	77
4.10	Spectra: spirantization in Spanish trills, mid-front intervocalic context	77
4.11	Spectra: non-lowered third formants, Spanish intervocalic rhotics	78
4.12	Acoustic landmarks used for analysis of intervocalic consonants	79
4.13	Formant trajectories of Spanish intervocalic liquids: W1	80
4.14	Acoustic targets of Spanish intervocalic liquids: W1	81
4.15	Formant trajectories of Spanish intervocalic liquids: W2, W3	82

4.16	Formant trajectories of Spanish intervocalic liquids: W4, M1	82
4.17	Acoustic targets of Spanish intervocalic liquids: W2, W3	83
4.18	Acoustic targets of Spanish intervocalic liquids: W4, M1	83
4.19	Midsagittal lingual articulation, Spanish intervocalic stop [ada]: W1	84
4.20	Midsagittal lingual articulation, Spanish intervocalic lateral [ala]: W1	85
4.21	Midsagittal lingual articulation, Spanish intervocalic trill [arra]: W1	85
4.22	Midsagittal lingual articulation, Spanish intervocalic tap [ara]: W1	86
4.23	Comparison of articulation, Spanish stop and trill, low intervoc. context: M1	86
4.24	Comparison of articulation, all Spanish liquids, low intervoc. context: M1 . .	87
4.25	Midsagittal lingual articulation, Spanish coronal stop [ede]: W1, M1	88
4.26	Midsagittal lingual articulation, Spanish liquids [ele]-[ere]-[ere]: W1	88
4.27	Midsagittal lingual articulation, Spanish liquids [ele]-[ere]-[ere]: M1	88
4.28	Analysis landmarks for Spanish intervocalic consonants	89
4.29	Midsagittal lingual articulation, Spanish intervocalic coronal consonants: W1	90
4.30	Susceptance to vocalic coarticulation: Spanish coronal consonants	91
4.31	Mean dorsal displacement, Spanish coronal consonants	91
4.32	Location of Spanish liquid dorsal gestures	93
4.33	Mean locations of Spanish liquid dorsal targets with respect to ‘schwa’	94
4.34	Variation in Spanish word-final rhotics: number of coronal closures	96
4.35	Number of Coronal Closures in Spanish rhotics	96
4.36	Spirantization of Spanish word-final rhotics	97
4.37	Dorsal articulation in tapped word-final rhotic: W3	98
4.38	Dorsal articulation in spirantized word-final rhotic: W3	98
4.39	Svarabhakti fragments in medial coda rhotics	99
4.40	Dorsal articulation in coda svarabhakti	99
4.41	Dorsal articulation of Spanish medial coda lateral: W3	100
4.42	Dorsal articulation of Spanish medial coda stop: W3	100
4.43	Articulation of Spanish medial coda consonants, three vowel contexts	101
5.1	Contrasting coupling graphs: Spanish coronal stops and liquids	104
5.2	Gestural organization in Spanish stop and liquid onsets	104
5.3	Gestural timing, lingual trajectories: Spanish stop and liquid onsets	105

5.4	Gestural parameters: TADA simulations of Spanish Liquids	106
5.5	TADA simulation: Spanish intervocalic lateral articulation [pala]	107
5.6	Simulated vocalic coarticulation in Spanish intervocalic stops and laterals	108
5.7	Spectra of simulated and spoken Spanish intervocalic laterals	109
5.8	TADA simulation: Spanish intervocalic tap articulation [para]	109
5.9	TADA simulation: Spanish intervocalic trill articulation [para]	110
5.10	Spectra of simulated and spoken Spanish intervocalic trills	110
5.11	Gestural organization in Spanish nasal and liquid codas	112
5.12	Coronal lag in Spanish coda rhotic articulation	113
5.13	Organization of complex Spanish onsets: /kla-/	114
5.14	Feature Geometries of liquids and vowels	116
5.15	A gestural account of liquid vocalization in Spanish codas	116
5.16	Metathesis of Spanish coda liquids	118
5.17	A gestural account of svarabhakti in Spanish medial rhotic-final clusters	119
6.1	Frequencies of Russian obstruent-liquid and liquid-obstruent clusters	129
6.2	Russian two-consonant word-initial clusters and frequencies of occurrence	131
6.3	Russian three-consonant word-initial clusters and frequencies of occurrence	132
6.4	Frequencies of occurrence of Russian nasal-liquid and liquid-nasal clusters	132
7.1	Midsag. lingual articulation, Russian non-palatalized stop [ada]: W3	140
7.2	Midsag. lingual articulation, Russian non-palatalized stop [ede]: W3	140
7.3	Midsag. lingual articulation, Russian non-palatalized trill [ara]: W3	141
7.4	Midsag. lingual articulation, Russian non-palatalized trill [ara]: M1	142
7.5	Midsag. lingual articulation, Russian non-palatalized trill [ere]: W3	142
7.6	Midsag. lingual articulation, Russian non-palatalized lateral [ala]: W3	143
7.7	Midsag. lingual articulation, Russian non-palatalized lateral [ele]: W3	143
7.8	Midsag. lingual articulation, Russian intervoc. non-palatalized stops: W3	144
7.9	Midsag. lingual articulation, Russian intervoc. non-palatalized trills: W3	144
7.10	Midsag. lingual articulation, Russian intervoc. non-palatalized laterals: W3	145
7.11	Susceptance to vocalic coarticulation: Russian non-palatalized consonants	145
7.12	Mean dorsal displacement: Russian non-palatalized coronal consonants	146

7.13	Location of Russian non-palatalized liquid dorsal gestures	148
7.14	Mean locations of Russian non-palatalized liquid dorsal targets	149
7.15	Midsag. lingual articulation, Russian palatalized stop [ed ^ɰ e]: W3	150
7.16	Midsag. lingual articulation, Russian palatalized stop [ad ^ɰ a]: W3	150
7.17	Midsag. lingual articulation, Russian palatalized stop [ud ^ɰ u]: W3	150
7.18	Midsag. lingual articulation, Russian palatalized trill [er ^ɰ e]: W3	151
7.19	Midsag. lingual articulation, Russian palatalized trill [ar ^ɰ a]: W3	152
7.20	Midsag. lingual articulation, Russian palatalized trill [ur ^ɰ u]: W3	152
7.21	Midsag. lingual articulation, Russian palatalized lateral [el ^ɰ e]: W3	152
7.22	Midsag. lingual articulation, Russian palatalized lateral [al ^ɰ a]: W3	153
7.23	Midsag. lingual articulation, Russian palatalized lateral [ur ^ɰ u]: W3	153
8.1	Contrasting coupling graphs: Russian coronal stops and liquids	156
8.2	Gestural parameters: TADA simulations of Russian non-palatalized liquids	157
8.3	TADA simulation: Russian intervoc. non-palatalized lateral [ala]	158
8.4	Spectra of simulated and spoken Russian intervoc. non-palatalized laterals	158
8.5	TADA simulation: Russian intervoc. non-palatalized rhotic [ara]	159
